

Storage . . .

If, as it sometimes happens, you find it necessary to store your treasured possession, be sure to call a firm like ours, which has a containerized warehouse and a state of the art fire and burglar alarm system. We have an advantage over old-fashioned open storage warehouse facilities.

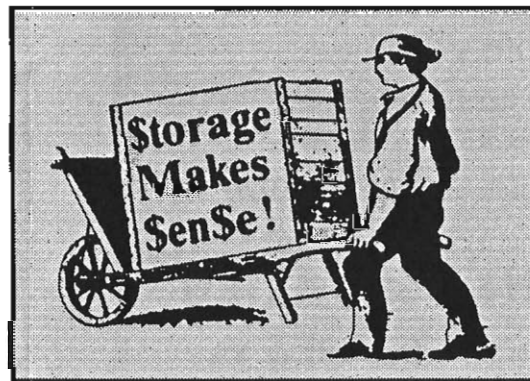

Yes indeed! Our containerized vaults are dust and moisture free, impervious to insect or rodent damage and even pilfering. And . . . they really protect your things from other types of damage, too.

So . . . whether you need storage-in-transit, or long-term storage . . . call Johnson Moving & Storage Company. We will be glad to tell you all about our storage programs and explain our service and charges. If you wish, we'll make an estimate of storage cost for the items you plan to store.

And . . . there's no charge for this pre-survey service.
